Glucosure Energy Boost

HIGH ENERGY SOURCE FOR TOP PERFORMANCE DAIRY COWS

- ✓ Boost milk yield
- ✓ Enhance appetite
- ✓ Increase feed intake

Trusted partner to farmers since 1859

*Maximising the nutritional value
of forage and moist feeds*

Glucosure Energy Boost

HIGH ENERGY SOURCE FOR TOP PERFORMANCE DAIRY COWS

Glucosure is particularly suitable for high- performance dairy herds, and where there is poor utilisation of energy sources and limited feed intake.

Used mainly in robotic milking systems, **Glucosure Energy Boost** gives an energy boost at milking time, and it helps bring the cow to the robot.

Glucosure Energy Boost offers exceptional palatability, and a slow-release high energy ingredient that can stimulate animals to increase their feed intake and enhance appetite.

Particularly suitable for high performance dairy herds, and where there is poor utilisation of energy sources and limited feed intake.

Feed Rate:

500g/head/day for high yielding dairy cows
