

NeoMilk™ Advanced

Enhanced performance and resilience

NeoMilk™ Advanced was developed for farms seeking to go beyond foundational nutrition and actively accelerate calf development. With greater nutritional density and targeted functional support, it promotes efficient growth while strengthening resilience and overall health.

Why choose NeoMilk™ Advanced?

Accelerated growth performance:

Higher protein and energy levels support faster, more efficient growth and improved development.

Precision nutrition:

An optimized amino acid profile supports efficient nutrient utilization and lean tissue development.

Reinforced immune resilience:

Advanced functional components support immune function and help maintain performance during periods of stress.

Stronger gut foundation:

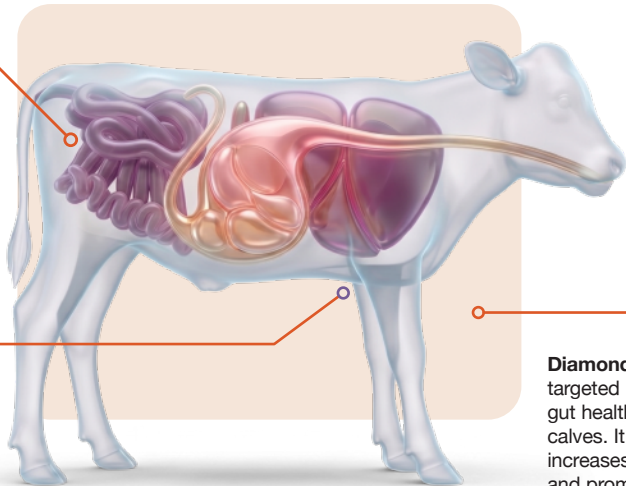

Targeted fatty acids and functional support promote gut integrity and digestive stability.

Enhanced performance and resilience

NeoTec™ optimizes calf growth and lifetime performance through a targeted blend of highly digestible short-, medium- and functional long-chain fatty acids. It enhances energy availability while supporting gut integrity and immune function.

NeoTec™ also enables a smoother transition from milk to solid feed, improves feed efficiency, resilience and post-weaning consistency.

AmNeo™2 advances protein nutrition beyond growth by supporting gut integrity, metabolic regulation and stress resilience. Designed for high-performance systems, it enhances efficiency, robustness and consistent post-weaning performance.

Diamond V™ Young Shield provides a targeted postbiotic solution that supports gut health and immune function in young calves. It stabilizes the gut environment, increases resilience to stress and pathogens, and promotes consistent intake and performance, particularly during weaning, contributing to greater lifetime productivity, including higher milk production during the first lactation.

Built on proven nutritional technologies.

Positive changes in gut microbiota ^[1]

Improves feed efficiency by (7%) ^[2]

Improves immune response ^{[3],[4]}

Reduces diarrhea severity ^[2]

Increases weight gain (10%) and body growth (6%) ^[5]

Increases future milk production ^[6]

NeoMilk™ Advanced combines higher protein levels with AmNeo™ amino acid technology, NeoTec™ functional fatty acids, and Diamond V™ Young Shield postbiotics, supporting accelerated growth, improved nutrient utilization, enhanced gut health, and greater immune resilience.

Nutritional Composition	Advanced
Crude Protein (min.)	22%
Ether Extract (min.)	18%
Crude Fiber (max.)	0%
Ash (max.)	7.5%
