NeoMilk™

NeoMilk™ Max

Advanced nutrition for maximum calf performance

NeoMilk™ Max represents the highest level of nutritional precision within the NeoMilk™ range. Designed for farms seeking the highest growth benchmarks, it combines formulation precision and high nutrient efficiency to help unlock the full potential of every calf.

Why choose NeoMilk™ Max?

Maximum growth intensity:
The highest energy and protein levels to unlock full growth potential and achieve ambitious performance targets.

Advanced nutrient precision:
Optimized amino acid balance to maximize nutrient efficiency and muscle development.

Resilience under high-performance conditions:
Reinforced immune and microbiome support helps maintain health and performance in high-output systems.

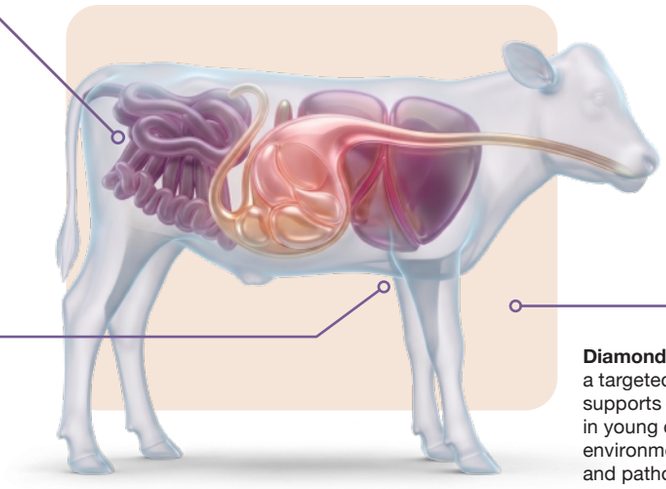
Strong gut integrity:
Targeted fatty acids support digestive and gut function under high nutritional supply.

NeoMilk™

Advanced nutrition for maximum calf performance

NeoTec™ optimizes calf growth and lifetime performance through a targeted blend of highly digestible short-, medium- and functional long-chain fatty acids. It enhances energy availability while supporting gut integrity and immune function.

NeoTec™ also enables a smoother transition from milk to solid feed, improves feed efficiency, resilience and post-weaning consistency.



AmNeo™2 advances protein nutrition beyond growth by supporting gut integrity, metabolic regulation, and stress resilience. Designed for high-performance systems, it enhances efficiency, robustness, and consistent post-weaning performance.

Diamond V™ Young Shield delivers a targeted postbiotic solution that supports gut health and immune function in young calves. It stabilizes the intestinal environment, improves resilience to stress and pathogens, and promotes consistent intake and performance—especially during weaning—contributing to improved lifetime productivity, including higher first-lactation milk yield.

Built on proven nutritional technologies.

- Whole-milk-level performance [1]
- Positive changes in gut microbiota [2]
- Improves feed efficiency by (7%) [3]
- Improves immune response [4],[6]
- Reduces diarrhea severity [3]
- Increases weight gain (10%) and body growth (6%) [5]
- Supports future milk production [7]

NeoMilk™ Max combines elevated energy and protein levels with AmNeo™ amino acid technology, NeoTec™ functional fatty acids and Diamond V™ Young Shield. Together, these support accelerated growth, optimized nutrient utilization, enhanced gut integrity and resilience in advanced calf-rearing systems.

Nutritional Composition	Max
Crude Protein (min.)	24%
Ether Extract (min.)	20%
Crude Fiber (max.)	0%
Ash (max.)	7%
