

NeoMilk™ Start

*Secure foundations
for steady and
reliable growth*

Great dairy performance starts long before the first lactation. **NeoMilk™ Start** provides calves with a strong and reliable nutritional foundation - supporting early-life health, steady growth, and consistent performance from day one.

Why choose NeoMilk™ Start?

Consistent growth from the start:
Balanced protein and energy support steady and efficient early development.

Supports early-life health:
Formulated to reduce digestive challenges and supports calf resilience.

High intake & palatability:
Encourages strong voluntary intake.

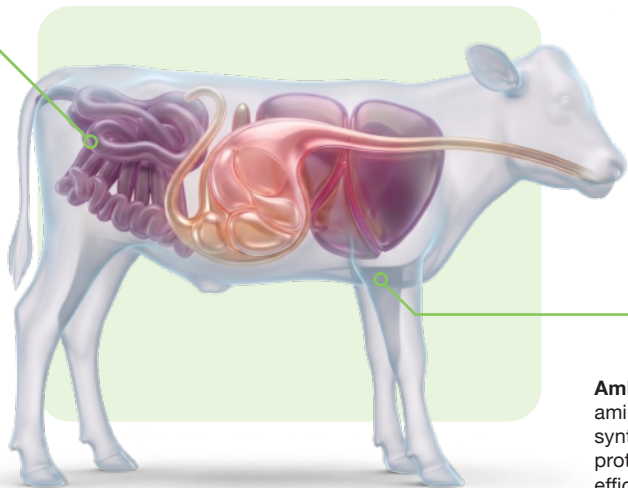

Easy and reliable feeding:
Excellent solubility ensures smooth preparation and consistent feeding every day.

Essential amino acids for consistent weight gain from early life

NeoTec™ optimizes calf growth and lifetime performance through a targeted combination of highly digestible functional short-, medium-, and long-chain fatty acids. The technology increases energy availability, supports gut integrity and immune function, reduces pathogen pressure, and provides a smoother transition from milk to solid feed, improving feed efficiency, resilience, and performance consistency after weaning.

High palatability and solubility to ensure the calf receives full nutritional benefits.

AmNeo™1 delivers the most limiting amino acids to ensure optimal protein synthesis without increasing crude protein levels. It improves nitrogen efficiency, supports lean growth and maintains consistent performance. It also supports gut stability during early life and weaning while helping reduce metabolic inefficiencies.

Built on proven nutritional technologies

Improves feed efficiency by (7%) ^[1]

Improves the immune response ^[2]

Reduces the severity of diarrhea ^[1]

Increase in weight gain (10%) and body growth (6%) ^[3]
